

Soil Systems Masterclass Beacon

Friday 24 September 2021

**Starting at 239 Walker Rd, Mollerin, finishing at the Beacon Country Club 25 Lucas St.
10:00 am to 4:30 pm**

About this workshop

This is one of a series of Soil Systems Masterclasses to help farming businesses capture carbon opportunities and become more resilient, profitable and sustainable. Soil Masterclasses will feature experts in soil biology and carbon farming, combining science and practical farming systems that underpin sustainable, biologically rich farming systems that build and maintain soil carbon.

The program will give farmers hands-on experience and understanding of a range of soil health topics, from landscape rehydration and the benefits of fodder shrubs, legumes and perennial grasses, to soil microbiome and the importance of livestock in biological systems.

Topics we will be covering:

- The Farmer experience- how we got here - Challenges, successes, starting carbon projects.
- Building soil carbon – it's not just about the ACCU's:
- The agronomists' perspective of soil carbon.
- Science of soil health and the benefits of soil biology to the farming system.
- Carbon Farming and Land Restoration Fund – starting soil carbon project

This event is kicking off at Dianne and Ian Haggerty's 13,000 ha cropping and grazing property in Mollerin. If you are interested in starting a Soil Carbon project under the Carbon Farming and Land Restoration Fund please come along!

Speakers include:

- Our hosts Dianne and Ian Haggerty
- Tim Wiley, Tierra Australia
- Australian Soil Planners
- Outback Carbon
- DPIRD Economist, Tony Della Bosca
- DPIRD Manager of the Carbon Farming and Land Restoration Fund, Kerrie House
