

THE ANNUAL 2022 BOODJA SOIL SCIENCE LECTURE 4.30-6.30pm Wednesday 28 September

Soil Science Australia (WA Branch) invites you to the annual WA Boodja Soil Science Lecture. The lecture is free and open to all.

Boodja is a Noongar word for “land” and the lecture series acknowledges the important role of Aboriginal understanding in the responsible management of our soil and land.

This year the Society is honoured to receive the WA annual lecture in Soil Science from the **National Soils Advocate, the Hon. Penelope Wensley AC.**

Former Governor of Queensland and distinguished Australian diplomat, the Honourable Penelope Wensley AC, has a long-held interest and substantial experience in natural resource management, environmental and sustainable development matters, and in Australia’s response to national and global challenges in these areas.

Dr Wensley was a key contributor to the negotiation of several landmark international treaties to address environmental challenges through the United Nations.

Please join us to hear the National Soils Advocate present on “**Policy driving Australia’s Sustainable Development Goals for Soil.**”

Premier Venue! River View Terrace Room (top floor) - the Aloft Hotel.

Light refreshments served from 4.30pm.

Seated for Lecture at 5.15pm!

Register via SoilsWest:
