Retaining water at Boyup Brook!

Introductory Workshop | Tuesday 21st March | 1 pm – 4:30 pm | Cost: \$40

Join Lance Mudgway and your hosts Lori and Warren at Paraway for a half-day overview of Landscape Rehydration on Paraway and participate in a paddock tour of landscape features. Join in the discussion on decision making to identify the site for landscape rehydration design, including overview of the potential techniques that will be used to improve function and rehydrate the area.

2-Day Bootcamp | Wednesday 22nd – Thursday 23rd March | Cost: \$300.

In this hands-on course, grow your skills and confidence to implement a Landscape Rehydration project on your property. We will learn how to read and assess water cycle health and identify issues. We then explore a variety of practical landscape rehydration strategies and tactics. You will learn the steps to developing a successful Landscape Rehydration Action Plan for your property.

Lance Mudgway is a hydrologist based in Wagin with 20 years' experience managing surface and groundwater in WA's agricultural landscapes repairing salinity and land degradation issues in the WA Wheatbelt. He has extensive experience and knowledge of natural capital, landscape properties and processes.

Erin Healy is a Landscape Planner with environmental engineering and regenerative agricultural qualifications. Erin has recently conducted a Literature Review of Landscape Rehydration in Western Australia.

Mulloon Institute is a leading research and education organisation helping to build resilient regional communities by supporting the long-term, sustainable growth of Australian agriculture. The Institute collaborates with farmers and stakeholders on catchment-scale landscape rehydration and restoration projects across the country to restore the ecological and agricultural functions of degraded landscapes.

RSVP: 10 March 2023
